

Ground Services

Bangor International Airport's Bangor Aviation Services comprises one of the most experienced, full service ground handling organizations worldwide. Bangor's ground handling personnel are dedicated to providing air carriers with prompt and professional, all encompassing service 24/7. Airside staff is renowned worldwide for its ability to turn any aircraft quickly and safely during a full service technical stop. A full government clearance technical stop averages a little over 60 minutes for a Boeing 757; 90 minutes for a Boeing 747.
